

OUR GREEN POLICY

Best Western Claydon Country House Hotel is committed to minimising the impact of its activities on the environment and the key points of its strategy to achieve this are:

- **Minimise waste by evaluating operations and ensuring they are as efficient as possible. We currently recycle Glass and Paper and cooking oils and are constantly reviewing other options.**
- **Meet or exceed the environmental legislation and approved codes of practice.**
- **Reduce the use of water, energy and other resources by introducing water saving systems and low energy bulbs throughout the hotel.**
- **Raise awareness, encourage participation and train staff in sustainable business practice.**
- **Encourage guests to use products and services in an environmentally sensitive way by providing information in the bedrooms with regard to towel and linen changes. Also give advice on how to minimise energy waste during their stay by providing clear information about heating and air conditioning units. No heating appliances automatically run unnecessarily.**
- **Source as many local products as possible to support the local community.**
- **Our environmental policy will become an integral part of our induction training.**
- **We are committed to an ongoing programme and our policy will be reviewed on a regular basis.**
